PROFESSIONAL SUMMARY

Software Engineer with 1+ year of professional experience building AI-integrated full-stack applications — specializing in NLP, RAG, vector databases, and applied ML. Currently deploying production AI systems at Zucus Technologies, plus enterprise backend experience at BEL. Skilled in Python, FastAPI, Groq API, scikit-learn, XGBoost, React.js.

TECHNICAL SKILLS

- AI/ML & Data: Machine Learning, RAG, Vector Databases, NLP, Groq API, scikit-learn, XGBoost, LightGBM, Pandas, NumPy
- Backend: Python, FastAPI, Flask, Node.js, Express.js, REST APIs
- Frontend: HTML, CSS, JavaScript, React.js
- Databases: MySQL, MongoDB, SQLite, SQL
- Analytics/Tools: Power BI, Tableau, Excel, Chart.js, Swagger, Postman, Git, GitHub, Render

PROFESSIONAL EXPERIENCE

Software Engineer — Zucus Technologies Pvt. Ltd. (Remote)

May 2025 – Present

Full Stack & AI/ML Development · Coimbatore, Tamil Nadu (Remote)

- Independently designed, built, and deployed an AI-powered SQL Assistant enabling natural-language database queries using RAG, vector retrieval, and NLP with the Groq API — achieving 90% accurate results, with automatic pie/bar chart generation and live deployment on Render.
- Contributed to additional full-stack and generative AI project work for client engagements while concurrently completing final semesters of engineering.

Junior Software Engineer — E2E Rosh IT Solutions India Pvt. Ltd. (Internship)

Jan 2026 – May 2026 (4 months)

3 months hybrid (office/WFH) + 1 month on-site at client location: BEL (Bharat Electronics Limited)

- Built AI-integrated full-stack modules (Python, FastAPI, MySQL, MongoDB, Groq API) within a defence-sector enterprise environment; developed REST APIs and dashboards using Chart.js, Swagger, Render, and GitHub.

PROJECTS

CareerForge — AI-Based Student Career Prediction Platform

- Educational data-mining project predicting student career outcomes from ~10 years of academic data; owned model training and backend, handling class imbalance via SMOTE and one-hot encoding.
- Benchmarked CNN, ANN, Random Forest, LightGBM, and XGBoost — achieved 92% accuracy with XGBoost + SMOTE. Added admin dashboard, CSV export, and PWA/Android wrapper support.

K-GIS — Karnataka Geographic Identification System

- Contributed to a government GIS-based land identification and construction-feasibility system speeding up land approval checks across Karnataka districts.
- Built the core land-lookup module (lat/long, survey number, polygon selection) and land-classification analysis (forest, agricultural, waterbody, mineral zones). Tech: FastAPI, GeoPandas, Shapely, PyProj, OpenLayers.

EDUCATION

B.E. in Information Science and Engineering

Sri Krishna Institute of Technology, Bangalore — CGPA: 8.0

Pre-University

JS Pre-University College, Bangalore — 80%

CERTIFICATIONS & TRAINING

- MERN Full Stack with AI — HSBC Digital Skills for Youth (Online) • Test Engineer — Infosys Finishing for Employability • Full Stack Development — Novitech Pvt. Ltd. • Python for Data Science — EDX

ACHIEVEMENTS

- Amazon ML Challenge 2025 — Team Leader, Top 250 rank in India • Build for Bengaluru & ANVESHANA 2026 participant
